

...the Road to Global Forum for Research and Innovation for Health 2015

8th Philippine National Health Research System (PNHRS) Week

August 12-14, 2014

Radisson Blu Hotel Cebu

Hosted by the Central Visayas Consortium for Health Research and Development (CVCHRD)

THEME: "Research and Innovation in Health for Disaster and Emergency Health Management"

BACKGROUND AND RATIONALE OF THE EVENT

The PNHRS Week celebration provides a platform for the different stakeholders in health R&D to interact, to learn from each other, to share information and experiences, to voice their concerns, to contribute research-based solutions to health problems, among other things.

This year's celebration focuses on the role of health research in disaster and emergency health management. As many factors contribute to health outcomes in emergencies and disasters, all plenary and parallel sessions will revolve around the key areas, namely: science for disaster preparedness and actions, use of information and communication technology and tools and policies, coordinating mechanisms for service delivery, and role of social media.
